

The Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear The Federal Communications Commission,

I support, and hope you will support the fair share plan. It's not fair to switch to a flat fee method. The "little people" of the world already have a hard time keeping up the the increasing costs of everything. I think that if the FFC wants to charge higher rates, then someone should push for pay increases. No one seems to care that we're getting paid as little as possible, but paying top dollar for everything!

Sincerely,

Stephanie Harper
